▶ English for QA (10h)
- Udemy (16h)
- ▶ Software Testing w/ Jira & Agile — QA Lead

▶ Master Cucumber BDD — Test Automation

// AWARDS

- ▶ Overall Star Rater (multiple)
- ▶ Top evaluator in Brazil

QA Engineer with 5+ years delivering quality for web, mobile, and SaaS products across international companies. Specializes in manual and automated testing — Functional, Regression, Smoke, API, and End-to-End — to ensure reliable releases. Strong hands-on experience with Playwright, Cypress, Postman, and REST APIs, building scalable automation while supporting CI/CD pipelines with GitHub Actions and Jenkins. Investigates production issues with Sentry, Firebase, PostHog, AWS, SQL, log analysis, and HAR files for root-cause analysis, and applies AI-assisted tools to accelerate test design, debugging, documentation, and quality workflows.

▪ EXPERIENCE

- Bilhon — QA Engineer

Oct 2025 – Present

Brazil · Remote

▶ Product QA for a large-scale SaaS platform spanning sales funnels, checkout, automation, messaging, landing pages, member areas, domains, APIs, integrations, and webhooks.

▶ Designed, maintained, and executed automated scenarios in Playwright and Cypress; validated REST APIs with Postman to raise coverage and release confidence.

▶ Owned QA from backlog refinement and sprint planning through release readiness; frequently acted on behalf of the QA Lead on quality decisions, prioritization, and mentoring.

▶ Identified high-impact security and fraud vulnerabilities — access-control flaws, file-upload validation, and business-logic exploits — for safer releases.

▶ Produced 400+ structured bug reports and Loom validation videos; used AI-assisted tools (Claude) to accelerate debugging, PRs, and documentation.

▶ Recognized by the CTO, CEO, and Product Manager for quality leadership and business impact.
- Metrobi — QA Engineer Consultant

Jan 2026 – Apr 2026

Boston, Massachusetts, USA · Remote

▶ Primary QA for a logistics and delivery SaaS platform, ensuring quality across web, mobile (Android & iOS), APIs, and internal admin portals.

▶ Validated end-to-end logistics workflows by creating deliveries, simulating operational scenarios, and verifying driver and customer journeys under real conditions.

▶ Investigated production issues via log analysis, Sentry, Firebase, PostHog, AWS, and root-cause analysis; validated fixes before release.

▶ Performed cross-platform validation on desktop, Android, and iOS, surfacing usability, performance, and production defects impacting customers.
- uTest — QA Engineer

Oct 2022 – Oct 2025

Framingham, Massachusetts · Remote

▶ Executed Functional, Regression, Smoke, Exploratory, API, and E2E testing across web, mobile, and desktop products for international clients.

▶ Tested products across SaaS, e-commerce, fintech, logistics, gaming, streaming, healthcare, and IoT, validating functionality, usability, and compatibility.

▶ Documented defects with detailed reproduction steps, logs, screenshots, and videos; verified fixes and validated new releases.

▶ Ran cross-browser, cross-device, and cross-platform testing while collaborating with globally distributed Agile teams.

TELUS Digital AI Data Solutions — AI Data QA

Oct 2015 – Oct 2025

Remote

▶ Evaluated web pages, search results, ads, and AI-generated content against detailed guidelines for accuracy, relevance, and policy compliance.

▶ Performed AI quality evaluation, data annotation, content classification, and multilingual review (Portuguese & English) to improve ML performance.

▶ Recognized as a top performer, including one of the highest-performing evaluators in Brazil.

▪ EDUCATION

Descomplica Faculdade Digital

Sep 2023 – Jan 2026

Bachelor's Degree, Systems Analysis
